Subject: Electronic Submission & Processing for Payments

I have just received an email in regards to Electronic Submission. I had in the past tried to sign up for Web Invoicing, however there was the restriction that vendors could not use the application if the DD's had to signed by an ACO. This is the case with 99% of our DD's. Has this changed? If not is there another form of transmission that can be used to accommodate a signed DD? Please advise.
